George Orwell Studies

George Orwell (1903-1950) is one of the most celebrated writers in the history of English literature. Perhaps most famous for his novels *Animal Farm* (1945) and *Nineteen Eighty-Four*, Orwell was also the author of political polemics, literary essays and a great deal of journalism. In his writings on everyday things such the common toad, boys' weeklies, cups of tea and sexy seaside postcards he virtually invented the discipline of cultural studies.

Orwell must be one of the most commented upon writers today. Yet still remarkable new insights into his life and writings continue to appear.

George Orwell Studies aims to explore and debate major issues relating to Orwell's life and works through a range of genres: academic papers, shorter articles, polemical pieces, reviews and news items. In particular, it will aim to promote international perspectives. Its work is supported by a distinguished editorial board of Orwell scholars and experts.
